

Pro800D Hi-Power Wire & Valve Locator

Unique Features Make Locating Easier

- 8 D Cell Transmitter Power
- 20% More Power
- Wireless Broadcast Cable Connection
- Totally New Wand Design
- Triple AC Buzz/Noise Rejection
- Null or Peak Wand Mode

What makes the Pro800D unbeatable

The Pro800D accurately tracks irrigation wires, finds missing valves and can detect major damage to vulnerable underground cables.

Offering all of the features you would expect from a premium wire and valve locator: adjustable transmitter power for optimal performance, a long lightweight receiver wand for easy tracking and a rugged custom case. Additionally, the Pro800D has enhanced AC noise and interference rejection, high power output, and an inductive mode which puts a tracing tone on an underground cable without making physical connection. By using this mode, it is unnecessary to disconnect target cables.

Finally, the receiver wand incorporates membrane switch controls which overcomes dirt and dust fouling their operation. Also the choice of peak or null reception, and both an external speaker and headset jack.

Truly, the Pro800D is one of the premium wire and valve locators on the market today.

Features

- Ergonomic, Light Wand Design
- High Power Output
- Membrane Switch Technology
- Low Battery and Power LEDs
- Unlimited Tracking Distance in Wireless/Broadcast Mode
- Audio and Analogue Meter Response Indicator
- Null or Peak Reception Modes
- Custom Moulded Case
- Headset & Ground Stake included

Specifications

Power Requirements:	8x D Size Batteries (Transmitter) 1x 9V Battery (Receiver)
Reception Depth:	Depth at 2.5 metre
Tracking Length:	Distance is infinite with Wireless/Broadcast Mode
Transmitter Frequencies:	2Khz and 175Khz in Wireless Mode
Power Output:	900Vp-p
Voltage Protection:	110Vac / 200Vdc
Warranty:	12 Months
